

Search Signs

These signs are for printing – preferably ahead of time – and using at a search Base. Unlike a full-color ASRC logo, the plain black ASRC logo will look good even if you print these on high-visibility colored card stock.

Group sometimes have big signs in their big opskits. You can certainly print these big for that purpose. However, these are ready to be printed at 8.5x11” for fitting into a mini-opskit filebox designed to accept paper that size.

You can print off several copies of the arrow sign and combine with any of the other signs. You can flip them to point in the other direction, or for that matter rotate in any direction, including up for “head this way.”

Version 1.0 approved by vote of ASRC Publications Committee 9/30/22.
